PURCHASE THE REQUIRED AMOUNT OF INSERTS AND GET THE CUTTER FOR FREE

Turbo 10 is a new high performance cutting tool for square shoulder milling, with improved tool life and precision. This is achieved through optimized cutting properties that reduce heat generation and cutting forces, and improved insert geometry that mills wall angles to precisely 90 degrees.

Turbo 10 is very flexible and suitable for most roughing, semi-finishing and finishing operations. Application areas include slotting, contouring, helical interpolation and ramping.

Select a cutter and the required number of inserts of any style listed below and input your ordering details.

FREE CUTTER VALUE UP TO \$459
