VIDEO: Donning a Tyvek® Protective Coverall

Brought To You by DuPont | Nov 03, 2020

Protective coveralls are designed to protect the wearer from hazards—but protection is not guaranteed by just wearing them. Proper donning (putting on the coverall) and doffing (removing the coverall) is critical to maintaining protection. In the short video above, DuPont provides step-by-step guidance on the proper procedure for donning its Tyvek® industrial protective coveralls.
