VIDEO: HPR Drill: Solid Carbide Drill for Cast Iron

Brought To You by Kennametal | Feb 01, 2021

Video Highlights

- High-speed, high-feed drilling up to 8xD, with standard through coolant supply.
- Patented corner radius enabling long tool life, excellent hole quality, while avoiding workpiece chipping during exits.
- Patented HPR point thinning providing excellent self-centering capabilities with low thrust, enabling excellent hole straightness.
- Four margin lands ideal for cross holes and inclined exits, proving maximum stability.

Learn more about the HPR drill and how it performs in cross-hole drilling: Watch this short video *Cross-Hole Crazyiness*.
