Safety

Video: Social Distancing in the Workplace: 4 Ways to Keep Workers Safe by Reducing Contact

| Feb 11, 2021

Video Highlights

- Wearable technology can help provide safer person-to-person communication
- Shifting training online can have financial benefits in addition to being safer
- Encourage remote or virtual work when possible, and stagger shift changes and break times to avoid creating crowds
- Setting standards that reduce visitors and limit employee movement can also help limit interpersonal contact and keep your workforce safe

When situations like COVID-19 require us to interact less, essential workplace services can still happen with reduced person-to-person contact.

You can protect your employees by using technology, shifting services online, and reimagining your workplace to reduce congestion.

Online training makes it easier for employees to find and reference information, and can help improve retention while also reducing your overall costs.

Let's Talk!

Got questions? Want to share how your operations have successfully reduced person-to-person contact? We'd love to hear from you.
