

How-to

VIDEO: Preparing Your Sump for a Holiday Shutdown

Brought To You by Master Fluid Solutions | Jun 01, 2021

Video Highlights

Prepare your sump for a holiday shutdown with these three simple steps:

1. Remove tramp oil
2. Clean out chips and sludge
3. Increase the concentration of coolant

Preparing your sump for a holiday shutdown can save you the aggravation of foul odors in the shop when you return to work. Follow the three simple steps in the short video above to ensure your sumps are ready for an extended period of time away.
