VIDEO: Milling of Aero Frame Applications with CoroMill® MH20

Brought To You by Sandvik Coromant | Aug 16, 2022

The CoroMill® MH20 is Sandvik Coromant's high-feed milling solution. Primarily designed for pocketing applications with optimized geometries for ISO S, M and P. CoroMill® MH20 ensures secure and vibration-free machining with long overhangs thanks to its light-cutting action in combination with a robust shank design. The inserts have a curved strong edge with reinforced corner radius ensuring secure and reliable machining against shoulders and corners in pocketing. *See the CoroMill® MH20 in action in the short video above (music only, no transcript).*
