VIDEO: TOOLING UP – The Business of Protecting People with MCR Safety

Brought To You by MCR Safety | Sep 13, 2022

Video Highlights

In this episode of MSC's Tooling Up Mitch Free is joined by Shawn Norfolk, MCR Safety's Market Development Manager, for a discussion on workplace safety and fire resistant garments. Norfolk walks us through MCR's newest cutting edge innovations like Summit Breeze Flame Resistant Clothing featuring it's patented Triple Vent Technology.

Shawn Norfolk explains that not all Flame Resistant clothing is created equal. Summit Breeze Technology is uniquely designed to direct most of the off-gas away from the face, severely reducing inhalation injury and fatalities.

We learn that MCR's company culture and commitment to protecting people is the ultimate driving force behind the constant innovation in the industrial safety garment sector.
