IMTS 2022 Video: Norton Revolutionizes Grinding with Quantum Prime

| Sep 14, 2022

Video Highlights

- The Quantum Prime ceramic grinding wheel from Norton | Saint-Gobain Abrasives features new grain technology that promotes better self-sharpening, more controlled wear and extended wheel life.

IMTS 2022 in Chicago showcases the latest innovations from thousands of manufacturing suppliers, including **Norton | Saint-Gobain Abrasives**. In this video, Andrew Biro, senior applications engineer, discusses the Quantum Prime ceramic grinding wheel.

Hailed as a generational-changing product, Quantum Prime features new grain technology—the microstructure has been modified to promote better self-sharpening and more controlled wear, helping to extend the life of the wheel.

The versatile grinding wheel has applications across many industries including aerospace, automotive, gears, tool room and medical.
