VIDEO: Tips on How to Machine Nickel-Based Alloys

Brought To You by SECO Tools | Feb 14, 2023

Watch Patrick De Vos, senior consultancy expert and corporate manager of technical education programs at Seco Tools, speaking at the recent Aero ITI event about machining nickel-based alloys. He discusses:

- **Machining Physics** — a machinability equation with variables and factors related to the cutting tool used and environmental constraints
- **Applied Machining Physics** — how to solve the machining equation
- **Measuring Abrasiveness** — the "scratching effect" and how to measure to micro-hardnesses

Learn more from Patrick on approaching workflow on machining jobs to optimize productivity: *SECO Explains 3 Industry Buzzwords That Can Boost Your Bottom Line*
