VIDEO: High-Feed Milling Solution for Open and Closed Pockets

Brought To You by Sandvik Coromant | Mar 14, 2023

The CoroMill® MH20 is Sandvik Coromant's high-feed milling solution, primarily designed for pocketing applications with optimized geometries for ISO S, M and P. CoroMill® MH20 ensures secure and vibration-free machining with long overhangs thanks to its light-cutting action in combination with a robust shank design. The inserts have a strong, curved edge with reinforced corner radius, ensuring secure and reliable machining against shoulders and corners in pocketing. *See it in action in the short video above (music only, no transcript).*
