VIDEO: High Performance Solid End Mill for Multi Materials–CoroMill Dura

Brought To You by Sandvik Coromant | Apr 04, 2023

Video Highlights:

Features

- Asymmetrical variable Helix design
- Variable flute spacing
- High quality substrate
- Controlled micro edge process

Application areas

- WhisperKut geometry can be applied in many applications and components across multiple industries
- Suitable in ISO P, K, M, S and H material in the general engineering and automotive industries
- Applicable for a large variety of operations
- WhisperKut technology is also available for Aluminum applications in a dedicated assortment

CoroMill® Dura is a new range of high-performing versatile solid end mills. The concept offers true flexibility in roughing to finishing operations in multiple materials. The key to success lies in the unique WhisperKut™ technology. Unequal helix angles effectively break up harmful harmonics, making smooth and stable milling easier than ever before. See it in action in the short video above (*demo only, no transcript*).
