VIDEO: Managing Rust – Featuring John Treese and Tony Gunn of MTDCNC

Brought To You by Master Fluid Solutions | Aug 01, 2023

John Treese, Global Training Director, speaks with Tony Gunn from MTDCNC on the importance of coolant management. One huge problem with coolant if not managed correctly is rust. Rust can be on your parts and even on your brand-new machines which can be detrimental, costing you thousands of dollars. It's important to maintain coolant concentration, keep machines full, test your water, and speak with your Master Fluid Solutions® representative regularly to prevent rust.
