VIDEO: Introducing Starrett Fast Cut

Brought To You by Starrett | Sep 01, 2023

Starrett Fast Cut Hole Saws feature a new tooth material and design and enhanced heat and wear resistance that improves product life. They provide a smoother, faster cut on a wide range of materials. Specifically suited to cutting stainless and mild steel sheets, the Fast Cut will also cut through tubes with a wall thickness of up to 3mm (1/8").

The FCH—Fast Cut Bi-Metal Hole Saws contain an extra cobalt HSS tooth material, and a new 5.5 TPI positive rake tooth design for less torque, resulting in a smoother, faster cut in all materials. Although designed for cutting stainless steel, metals, and mild steel sheet, the Fast Cut Saws will cut through wood, plastic, plaster, and other materials. Recommended cutting depth — up to 13mm (1/2") in softer materials.

Features:

- 30% extra gullet volume for better material penetration.
- Ideal for 3mm stainless steel, mild steel sheet, tubes, and other materials with a thickness of up to 13mm (1/2").
- Size range: 14mm - 210mm (9/16" - 8.9/32").
- 41mm (1 5/8") hole saw depth.

Watch it in action in the short video above (*music only, no transcript*).
