VIDEO: HELP WANTED – Mission Design & Automation

| Oct 12, 2023

Video Highlights

In this episode of MSC's newest series "Help Wanted", we are taking a deeper look into a few of the many roles the manufacturing industry has to offer. Today, we're at Mission Design & Automation in Holland, Michigan speaking with three individuals from a variety of professional backgrounds. Learn about the role and responsibilities of a Controls Engineer with Steve Solack, take a deeper dive into the exciting art of welding with Fabrication Specialist Chad Vanderkooi, and see firsthand how Sajina Poudel flexes her intellectual and interpersonal skills as an Applications Engineer. Whether your career ambitions are guiding you to the shop floor, boardroom, or out in the field, this is an episode you have to watch.

For even more insights and expertise check out MSC's Better MRO knowledge hub.

"Help Wanted" is a video content series from MSC Industrial Supply developed with the purpose of introducing those interested in manufacturing to the various roles and positions available within the industry. In each Help Wanted episode you'll hear from a variety of diverse individuals working in all sorts of positions within manufacturing. You'll also see real data that supports key points of interest surrounding each highlighted role. At MSC, we are dedicated to expanding the manufacturing workforce with skilled and passionate individuals.
