VIDEO: HELP WANTED – OSG

| Dec 20, 2023

Video Highlights

In this episode of MSC's newest series "Help Wanted", we are taking a deeper look into a few of the many roles the manufacturing industry has to offer. Today, we're at OSG in St. Charles, Illinois speaking with three individuals from a diverse array of professional backgrounds. Learn about the role and responsibilities of a Product Engineer with Alyssa O'Brien, hear about what it takes to fill the position of Manufacturing Engineer from an eager newcomer, Trey Fry, and get insights into what it takes to be a Production Supervisor from Homero Valdez, who was trained in the field by his own father from a young age. Whether your career ambitions are calling you to design new products, to turn designs into reality, or to manage teams who do both, this episode is sure to give you insights you'll need along your journey.

For even more insights and expertise check out MSC's Better MRO knowledge hub.

"Help Wanted" is a video content series from MSC Industrial Supply developed with the purpose of introducing those interested in manufacturing to the various roles and positions available within the industry. In each Help Wanted episode you'll hear from a variety of diverse individuals working in all sorts of positions within manufacturing. You'll also see real data that supports key points of interest surrounding each highlighted role. At MSC, we are dedicated to expanding the manufacturing workforce with skilled and passionate individuals.
