VIDEO: TOOLING UP: Precision Measurement Just Got More Precise

| Oct 14, 2024

Video Highlights

In this episode of MSC's Tooling Up, Toni Neary sits down with Mike Browner, Product Manager for Sensors and Scales at Mitutoyo, to explore the latest advancements in surface measurement technology. Mike discusses the details of Mitutoyo's non-contact inline sensors, emphasizing their precision, ease of integration, and game-changing impact on factory automation. The conversation highlights the remarkable 20-micron accuracy of the current model and teases the upcoming release of a 9 micron sensor, marking a new frontier in measurement solutions. Mike also discusses how real-time data collection is helping manufacturers reduce scrap and improve production efficiency. Join Toni and Mike as they uncover how Mitutoyo continues to set the standard for precision and innovation in the industry.
