VIDEO: Scotch-Brite™ vs. Wire Wheels: Speed & Safety Demo for Surface Prep

Brought To You by 3M Abrasives | Mar 03, 2025

Video Highlights

- With Scotch-Brite™ nonwoven technology, you get both safety and speed.
- See primary rust and paint removal applications in action.
- The nonwoven web exposes fresh abrasive to the surface for a consistent, smooth finish.
- 90% less hand-arm vibration than traditional wire cup brushes.
- Up to 54% faster paint removal than crimped wire cup brushes.

Experience the superior performance of Scotch-Brite™ XT Pro Discs as they outpace wire wheels in both speed and safety. In this demo, see firsthand how these discs enhance your surface preparation needs (*music only, no transcript*). Upgrade your toolkit today and achieve high-quality results with 3M Abrasives.
