

How-to

VIDEO: HOW TO Put Innovation to Work for You

| Apr 18, 2025

Video Highlights

In this episode of MSC Industrial Supply's "How To" series, Jacob Sanchez visits the 3M Customer Abrasive Methods (CAM) Center in St. Paul, Minnesota, to uncover how innovation in abrasives goes beyond product—it's about process. Jacob connects with 3M experts Mike Eggert, Kaeleigh Wilkins, and Tyler Naatz to experience firsthand how 3M partners with manufacturers to deliver real results. From testing new abrasive technology on heavy welds to exploring how robotics can streamline grinding and finishing workflows, this episode highlights how manufacturers can improve safety, efficiency, and quality. With solutions like Cubitron™ 3 fibre discs and the ability to simulate real shop conditions, 3M shows how small to mid-size operations can access high-end capabilities without high-end risk. Whether you're looking to reduce vibration exposure or explore automation, this visit to the CAM Center shows how 3M helps put innovation to work—right on your shop floor.
