

Worker Safety

3M Hearing Protection Fit-Testing eBook

Brought To You by 3M Personal Safety Division | May 05, 2025

Take advantage of best practices in hearing conservation recognized by key opinion leaders and regulators: explore the power of the 3M™ E-A-Rfit™ Dual-Ear Validation System.

The 3M Hearing Protection Fit-Testing eBook focuses on the benefits of fit testing and what it means to your hearing conservation program – including how the world is moving toward fit testing. Now, fit testing is recognized as a best practice, and it's critical to know what to look for in a fit-test system.

This eBook will walk you through how using fit-test systems can help better protect workers and how the acceptance of fit testing is changing hearing conservation. 3M will also explore studies from around the globe and across several industries on how fit-test systems perform in real-world conditions, looking at the results, costs, value, impact on other PPE and more. You'll find out more about the 3M™ E-A-Rfit™ Dual-Ear Validation System and how it complies with the European guidance document EN 458: 2016 and why it might be an ideal fit for your Hearing Conservation Program (HCP).

Finally, 3M will help you assess or start your hearing conservation program and provide solutions for managing a successful program for years to come.

Download a copy of the 3M Hearing Protection Fit-Testing eBook and learn how you can begin or enhance a hearing conservation program to better protect workers.
