## **VIDEO: Milling Cutter for Finishing Bi-Metal Materials**

Brought To You by Sandvik Coromant | May 20, 2025

The M610 from Sandvik Coromant is a stand-alone product for finishing milling of bi-metal materials (aluminum and GCI). It requires no set-up and no adjustment, and results in high feed rates with no chipping, burring or scratching on the parts. Watch it in action in the short video above (*music only, no transcript*).
