

Real-Life Stories

What is a Composite Technician?

| Jul 19, 2017

A Composite Technician uses innovative products such as graphite, carbon fiber, fiberglass or Kevlar to create or repair items from boats to airplanes. Listen to an experienced Aircraft Mechanic who specializes in composite repairs explain the many different responsibilities of this occupation and the skills you need to be successful in the aerospace and advanced manufacturing industries.

Video Highlights

- Composite is a fabric that can be put over a repair to make it flush and be air worthy for an airplane.
- Composites are being used within the aerospace industry for the airframes, the wings, radoms and rudders.
