Metal Cutting Training You Can Take Anytime, Anywhere

Brought To You by Sandvik Coromant | Sep 25, 2017

The ever-changing world of manufacturing requires constant application to keep metal cutting skills fresh. Better MRO and Sandvik Coromant have partnered to offer you the Sandvik Coromant free metal cutting e-learning program that will help you learn the basics and keep up with the latest techniques and technology.

Competence in metal cutting is in short supply worldwide, and demand is growing for education to meet the complexity of modern manufacturing. That is why offer the world's first comprehensive e-learning for metalworking skills. Online training means you can take courses anywhere, at any time, at your convenience.

Learn the basics of metal cutting

The Sandvik Coromant metal cutting e-learning is based on the 360-page Metal Cutting Technology (MCT) training handbook which is available to view online or to download. Adapted from the handbook, the e-MCT version is broken down into short training courses that includes animations, voice over, video clips, and text. Participants get an understanding of the basics of production economics and how to improve productivity and profitability and it includes metal cutting terminology and definitions and how to apply tools for turning, milling, drilling, boring and tool holding.

Tailor the training to your needs

You can complete the entire training program or just complete sections that apply to you right now. The e-learning is divided into nine chapters and 75 short courses and it covers theory and application within the following areas:

- Machinability (work piece materials and cutting tool materials)
- Turning
- Parting & Grooving
- Threading
- Milling
- Drilling
- Boring
- Tool holding
- Other information (machining economy and maintenance)

Register for free *e-MCT training*.
