

Personal Protective Equipment

Personal Protective Equipment (PPE) for the General Manufacturing Sector

Brought To You by DuPont | Oct 17, 2017

DuPont offers a wide range of protective clothing—from low protection to high—that addresses the needs of manufacturing workers. With DuPont protective apparel, employers can enjoy peace of mind knowing that their workers are protected from a variety of hazards so that they can perform at their best.

USES FOR DUPONT PPE

General manufacturing consists of both light and heavy manufacturing activities, all of which require different levels of PPE depending on the activity and hazard faced.

Examples of light manufacturing activities include:

- Apparel production
- Food processing
- Pharmaceutical handling
- Dirty jobs

Examples of heavy manufacturing activities include:

- Chemical handling
- Equipment/machinery maintenance
- Heavy equipment manufacturing
- Plastics manufacturing
