IMTS 2018 VIDEO: Norton Saint-Gobain Deepens Aerospace Grinding Focus

| Sep 13, 2018

Video Highlights

- The demand for high-performance grinding tools continues to grow as aerospace manufacturers expand their use of nickel-based alloys and composite materials. A Norton Saint-Gobain engineer details tooling features that allow for high material removal without sacrificing end-product quality.

The demand for high-performance grinding tools continues to grow as aerospace manufacturers expand their use of nickel-based alloys and composite materials.

A Norton Saint-Gobain engineer details how his company creates tooling features that allow for high material removal without sacrificing end-product quality.

Participant:

- K. Philip Varghese, Group Leader, Advanced Application Engineering, Norton Saint-Gobain
