ASSP Safety 2019 Video: Innovation in Safety Products

| Jun 11, 2019

Video Highlights

- At National Marker Company, customizable shadow boards help reduce tool waste.
- At DuPont Personal Protection, the latest **Tyvek coveralls** come in a high-visibility version.
- At Streamlight, new **headlamps** are lighter and last longer than traditional models.

We roam the floor at ASSP's Safety 2019 expo in New Orleans to share new safety innovations on display.

Makers of safety products strive to develop new features that can help safety chiefs reduce risk exposure for their workers while also improving their companies' return on investment.

But whatever the tool or gear, safety solution providers encourage businesses to evaluate products based on their workers' unique needs and the specific environment.

Participants:

- Jeff Jordan, Regional Sales Manager, National Marker Company
- Dan Bowen, Northeast Regional Sales Manager, DuPont Personal Protection
- Danny Williams, Regional Sales Manager, Industrial & Fire Division, Streamlight
