Video: KOR™ 5 King of Roughing: Rise and Take the Throne

Brought To You by Kennametal | Jan 02, 2020

Video Highlights

Some of the unique features of the new KOR™ 5 from Kennametal include:

- High-efficiency metal removal capabilities in aluminum.
- Features that maximize capabilities of 5-axis machines.
- Dynamic milling, using CAM tool path generation software.
- A proprietary flute form, and chipbreaker enabling 3 x D maximum depth of cut, and perfect chip evacuation.

With the **KOR™ 5** 5-flute end mill, table feed rates increase up to 66% compared to commonly used 3-flute tools—redefining productivity for aircraft manufacturers and their suppliers.

Watch the short video above to see the KOR™ 5 in action.
