APPROVED FOR THE AEROSPACE IN DUSTRY

TRIM® HyperSol™ 888NXT

Revolutionary TRIM® HyperSol™ 888NXT's neo-synthetic aerospace machining fluid is redefining excellence in the coolant industry. For exceptional performance, versatility, lubricity, and trouble-free production, look no further than HyperSol™ 888NXT.

Extremely versatile, HyperSol™ 888NXT offers exceptional performance on difficult-to-machine aerospace high-nickel alloys, titanium, stainless steels, and Inconel®, while providing the superior lubricity for machining soft, gummy aluminum alloys. Delivering low foam, low odor, and a long-running lifespan while meeting the strictest environmental regulations, HyperSol 888NXT meets the competitive demands of the aerospace industry head-on.

Turbo-charge your production with TRIM HyperSol 888NXT!

Case Study

OPERATION:

Machining titanium, Inconel, and forged aluminum

APPLICATION:

The UK division of a global company manufacturing impellers for aerospace turbojet engines and automotive turbochargers, runs 32 machines throughout its facilities. With high tooling costs, the manufacturer sought to increase tool life without sacrificing productivity.

Master Fluids Solutions ran a trial of high-performance, TRIM HyperSol 888NXT neo-synthetic on two CNC lathes machining and turning 35NCD16 steel alloy and the results were dramatic.

Tool life skyrocketed 234% while running at higher speeds with less fluid consumption. With the dramatically reduced tooling costs, significantly reduced coolant costs of 7.6%, and overall production gains, the manufacturer anticipates 20.2% annual savings.

Make the switch to long-running HyperSol 888NXT neo-synthetic for the long run!

APPROVED FOR THE AEROSPACE INDUSTRY

TRIM® MicroSol® 590XT

With its cutting-edge technology MicroSol® 590XT is a maximum lubricity, advanced technology, semisynthetic microemulsion, specifically developed to meet the aerospace industry's most stringent specifications.

MicroSol 590XT surpasses the most stringent chemical content, environmental, and machining requirements of the global aerospace industry – with flying colours.

Highly lubricious MicroSol 590XT has it all: absolute foam control, dramatically extended sump life, superior corrosion and surface finish protection – all delivered with reduced downtime and an increased bottom line.

Exceed your production expectations with MicroSol 590XT.

Case Study

OPERATION:

High-production machining of aerospace materials APPLICATION:

A major aerospace manufacturer primarily machines aluminum, titanium, stainless, Inconel[®], and other aerospace alloys for the global aerospace industry. As a premier supplier of structural components to aerospace Tier 1 and Prime OEMs, the high-production facility runs multiple shifts on approximately 35 machining centres.

Previously, they had used a coolant that had the necessary aerospace approvals, but experienced problems with odor, residue, and foaming. Offering foam control and approvals from major aerospace manufacturers, premium MicroSol 590XT was a logical switch. Running MicroSol 590XT, the customer has seen an improvement in overall machine cleanliness, their foul odor and foam issues are gone, and they are achieving excellent tool life and surface finish on their parts. They're completely impressed with the cost effectiveness and performance of MicroSol 590XT.

See your production soar with MicroSol 590XT!

BOEING FULL AEROSPACE APPROVAL

7

TRIM® MicroSol® 585XT

Also from the MicroSol family is the highly lubricious TRIM® MicroSol® 585XT semisynthetic, microemulsion coolant. It provides excellent lubricity, surface finish, foam control, and dramatically extended tool life without chlorinated EP additives.

TRIM MicroSol 585XT is exceptional for machining titanium and aluminum alloys, highly-engineered thermoplastics and composites. The extremely hard-water tolerant, fast-wetting coolant markedly extends sump life and provides superior corrosion protection along with substantial savings on time and material.

For exceptional lubricity and surface finish, use MicroSol 585XT.

Case Study

OPERATION:

Milling and turning aluminum, titanium, and aerospace alloys

APPLICATION:

A USA-based manufacturer of aerospace turbine blades was experiencing problems with other coolants: from foul odor and high carryoff, to damaged seals and residue, as well as smoking and excess makeup. The customer ran tests on MicroSol 585XT and found that smoking and misting were significantly reduced, there were no bad odors or damage to seals, and usage was measurably reduced.

With the switch to MicroSol 585XT, they have experienced much longer sump life, and problems with smoking, residue, foul odor, seal damage, and excess carry-off are a thing of the past. The customer has seen a significant boost to their bottom line with MicroSol 585XT!

APPROVED FOR THE AEROSPACE INDUSTRY

TRIM® MicroSol® 690XT

Meeting increasing demands of the aerospace industry head-on, TRIM® MicroSol® 690XT is the pinnacle of high-performance microemulsions. It delivers unsurpassed lubricity with dramatically extended tool life and improved foam control.

MicroSol 690XT provides exceptional surface finish and tool life on the difficult-to-machine aerospace aluminum alloys, Inconel, titanium, and stainless and high tensile-strength steels. With an ultra-low foam profile, this next generation microemulsion tackles high-pressure, high-volume applications. It's an excellent alternative to the increased consumption experienced with high-mineral soluble oils, tooling underperformance, and machine compatibility issues of a synthetic.

For peak performance, make it MicroSol 690XT.

Case Study

OPERATION:

Cutting Inconel, tapping aluminum

APPLICATION:

Hy-Speed Machining in Oregon produces parts for the aerospace industry. After using a full synthetic, they switched to MicroSol 690XT with astonishing results.

Their cutting time for Inconel went from 12 minutes per piece to less than 41/2, and the \$450 drill lasts SIX times longer!

Formerly when tapping parts, they would line them up, start the taps, put in a machine override to add tapping oil, then resume. Now, with MicroSol 690XT, they just start it up, walk away, and "come back to beautiful parts." Sold on MicroSol 690XT, Hy-Speed Machining has cut coolant and tool costs dramatically and increased production— and have used it for nine years running!
